

SPECIALISTS IN **VIBRATORY TECHNOLOGY**

We design and manufacture **high-quality vibratory feeding systems** for production automation across a wide range of industries throughout Europe..

VIBROFEED
vibrofeed.com

Vibratory feeding systems for production automation across a wide range of industries — from automotive to pharmaceuticals.

We provide our clients throughout Europe and worldwide with comprehensive tailor-made solutions, a personalised approach, and guaranteed quality.

Custom Made

Individual approach to every project

Quality

Guaranteed reliability and long service life

Support

Service and support throughout the entire lifecycle

VIBRATORY FEEDING Solutions

Vibratory feeding systems

1

Controlled vibrations for the automatic conveying, sorting and orientation of parts on the production line.

Vision inspection systems

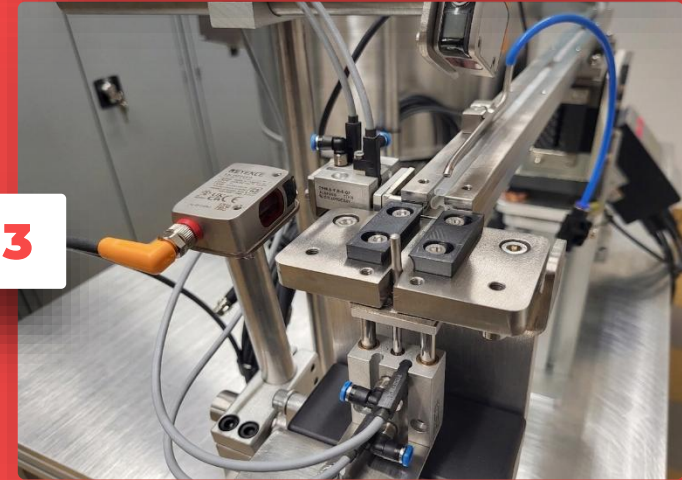

2

Inspection of part orientation, AI-based quality control, OCR, optical measurement, and part identification.

Pick-up nests

3

Precise positioning of parts ready for pick-up by a robot or manipulator.
